Extended -- just like the Cash for Clunkers Program

Announcing the AdvanTec Stimulus program.

We at AdvanTec information Systems, LLC are subject to the same economic and credit crunch problems as all American businesses. We have seen the economy come to a standstill and thank goodness it seems now to be lifting. The leading indicators (the stock market) have been making serious gains for months and the lagging indicators (newly unemployed) have been decreasing. The uncertainty over banks and the auto industry are seemingly under control. Even housing is starting to make a comeback.

However, business is still soft and many of our prospective clients have been dragging their feet with a wait and see attitude.

We have touched base with all our leasing sources and they assure us that they have money to lend.

Just like the federal program of investing in the country – by repairing and improving the national infrastructure to stimulate the economy – you should be improving your business infrastructure (hardware and systems) to be more efficient so that you do not go back to business as usual but to business better than usual.

Our systems and solutions can help you in this endeavor and we are willing to help by offering our own Stimulus package as an additional incentive.

10% off all new projects that go to contract by ~~July 15th~~. Sept 1st

This additional discount is on all proposals and written estimates already issued.

Sincerely

Joseph R. Fisher
