

Designed To Allow Custom One-off Work Order Variations in Distribution / Job Shop Environments.

- Works in conjunction with UA Accounting Software and AdvanTec Production Control Module
- Allows salesperson to take orders for items that contain custom assembly specifications
- Saving sales order generates custom Work Order
- Invoice prints out with customized component listing
- Configuration Types: Quantity, Dimensional, Blend

- Displays listing of all materials that make up an inventory item based on Bill Of Materials
- Displays Total Configuration Price
- Allows salesperson to change components and quantities
- Automatically recalculates Extended Price and Total Configuration Price
