

# **Dental Hygiene /Dental Assistant School Academic Administration and Clinical Practicum**

## **Problem**

A Community College operating a Dental Hygiene and Dental Assistant program needed a way to administer and schedule their students as well as run the clinic where the students complete their required procedures for graduation/certification.

Several commercial software packages on the market were investigated that could do either education administration or dental clinic operations. None could integrate the two disciplines to enable easy tracking of the clinical tasks performed and the coursework.

The clinical solutions were additionally restricted to a small number of chairs while the dental school need to work with 32 chairs.

## **Solution**

AdvanTec designed and implemented a totally integrated business solution comprised of:

### Academic Administration

- Student Registration/Matriculation
- Course Assignment
- Grade Books
- Clinical Requirements grading/tracking
- Reporting

### Clinical

- Patient Records
- Clinical Appointments/Scheduling
- Student Availability Scheduling
- Patient/procedure assignment
- Super Bill/ Billing/ Cash Management
- Treatment Plans/ADA Procedures

## **Benefits**

- Multi-user (15) access
- Integrated records easily identifies students progress
- Less paperwork
- Better use of resources
- Academic management of classes to meet student needs
